Lipex SMP™

Recommended applications: skin care, make up, cosmetic stick and pencil formulations

INCI NAME Hydrogenated vegetable oil

A highly versatile, oxidative stable, solid emollient with a sharp melting profile and excellent crystallinity. It combines a silky-smooth richness with a soft-dry skin feel to offer unique textures transformations in face, hand and body care formulations. Suitable for both emulsion and anhydrous-based systems, it is an excellent base for creating aerated products and is an efficient texturizer for cosmetic pencils, sticks and crayons.

Appearance: white, waxy, sharp-melting solid
Slip melting point: 35 °C
Solid fat content at 35 °C: 0%
Oxidative stability index (110 °C): >100 hours

COSMOS
APPROVED

Typical use concentrations: 1 – 20% in emulsions and 20 – 30% in pencils

Key features and benefits

- Solid at room temperature transforming rapidly to a low viscosity liquid at body temperature with the potential to provide a cooling sensation when melting.
- Rapid solidification and excellent crystallinity combined with high oxidative stability ensure long shelf-life of the final formulation.
- Compatible with natural and synthetic waxes, liquid vegetable oils and esters, as well as pigments and fillers, Lipex SMP is an efficient texturizer for cosmetic pencils, sticks and crayons, delivering a smooth, rich pay-off with a dry film on application.

NB: Lipex SMP offers limited mixability with tropical butters and long chain fats.
